crofabiotech

Founded 2022
Buenos Aires, Argentina

The first Latin America startup with a genetically edited piglet born, now backed to advance a solution to the global organ shortage.

Genetically edited organs suitable for human transplantation

MEDICINE FACES A STRUCTURAL LIMIT:
AN INEFFICIENT, SLOW AND NON-SCALABLE MODEL.

+4M	PEOPLE NEED A TRANSPLANT EVERY YEAR WORLDWIDE
< 5%	OF THEM ACTUALLY RECEIVE ONE

SCIENTIFIC VALIDATION

uspto
Patent filed with the USPTO
Application No. 63/788,495

Fundación Empretec Argentina
Empretec Award for Innovation

Ohio Children's Hospital Association
Validated by Ohio Children's Hospital

CrofaPig®

Own biotech platform delivers gene-edited pigs as a reliable, scalable source of **organs compatible with humans**, validated end to end from gene editing to birth.

Gene editing
CRISPR/Cas9 advanced editing, validated and protected IP.

Cloning & reproduction
Nuclear transfer, embryo transfer, reproductive biotech.

DPF facility
Certified pig herd, preclinical & clinical capability.

Clinical & regulatory execution
In-house stem cell generation (ESC, iPSC, MSC); direct engagement with regulators (INCUCAI, IXA).

Same team ran the world's 2nd xenotransplant trial and monitors patient safety.

FOUNDERS

LONGEVITY
Seed Round 2026:
U$D 6.000.000
LONGEVITY VENTURE FUND I

2023
→ Team buildout
→ Donor pig line development
→ Cloning standardization

2024
→ International validation of full gene editing
→ EMPRETEC innovation award

2025
→ USPTO filing
→ WHO xenotransplant representation

2026
→ First triple-knockout piglet born.
→ U.S.-backed seed extension secured.
→ Preclinical phase underway.
→ Next-generation gene-edited pigs.

STRATEGIC ALLIANCE & ADVISORY BOARD

ADVISORY BOARD				
	Dr. Muhamed Mohiudin Xenotransplantation	**Daniel de Florian** AI, CIAI	**Marcelo Grabois** IP, ITERA	**Diego Garrido** Legal

INSTITUTIONAL COLLABORATIONS

Ohio Children's Hospital Association · UNLPam · Eledon Pharmaceuticals · Cellarion · CEMIC · ITAC · UNSAM · Fundación Favaloro
