

THE PROBLEM

Finding the right molecule, validating its effect, and generating strong intellectual property still remains a manual and fragmented process that costs companies around USD 1 Million per bioactive and can take between 2 and 7 years of development.

THE SOLUTION

An agentic platform that enables companies to identify new molecules, detect activity patterns, and secure bioactive novelty in minutes.

CUSTOMERS

R&D teams or scientific leadership of:

Agro

Cosmetics

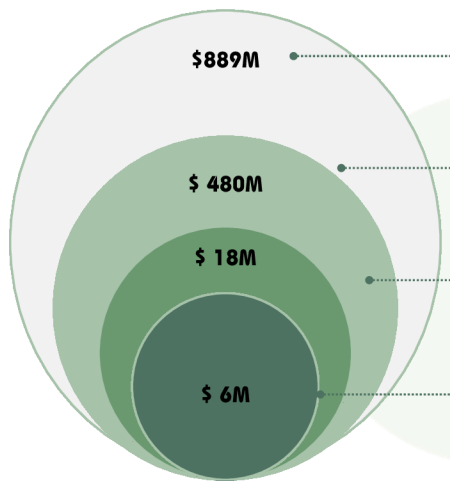

Nutrition

Pharma

MARKET OPPORTUNITY

Global market

Combined global bioactive markets across multiple industries.

TAM

Based on 8,000 potential clients per year, USD 60,000 per client.

SAM

3,000 clients per year, USD 60,000 per client.

SOM

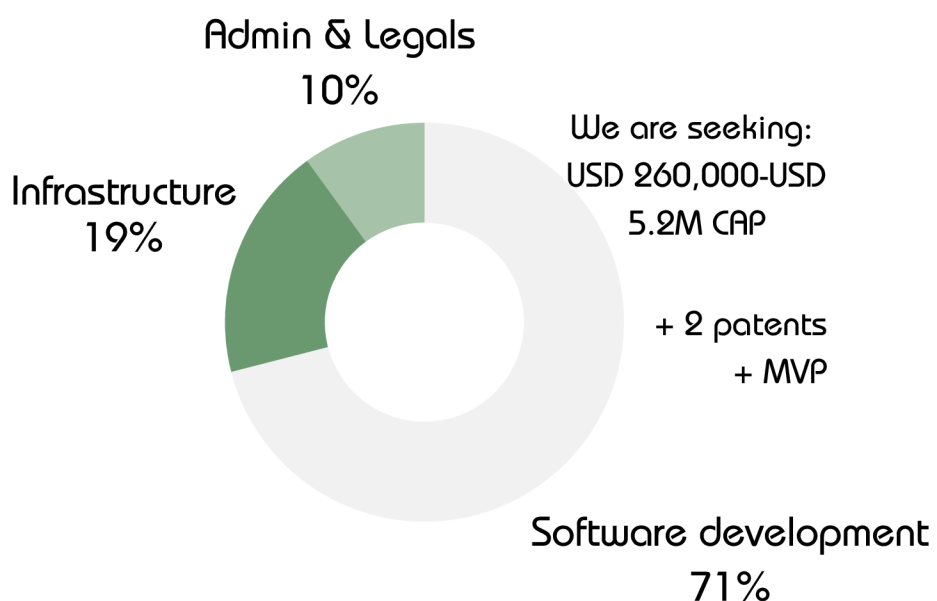

100 clients per year, USD 60,000 per client.

DIFFERENTIATOR

While the competition keeps the tool for itself, we make the tool available to everyone.

Competition: Brightseed, Schrödinger Suit, NatureEx.ai, Pangea Bioscience y Ginko Bioworks

REQUIRED INVESTMENT AND USE OF FUNDS

BUSINESS MODEL

Subscription-Based SaaS

Premium scientific modules

Collaborative projects

FOUNDING TEAM

Rafael, MSc
CEO

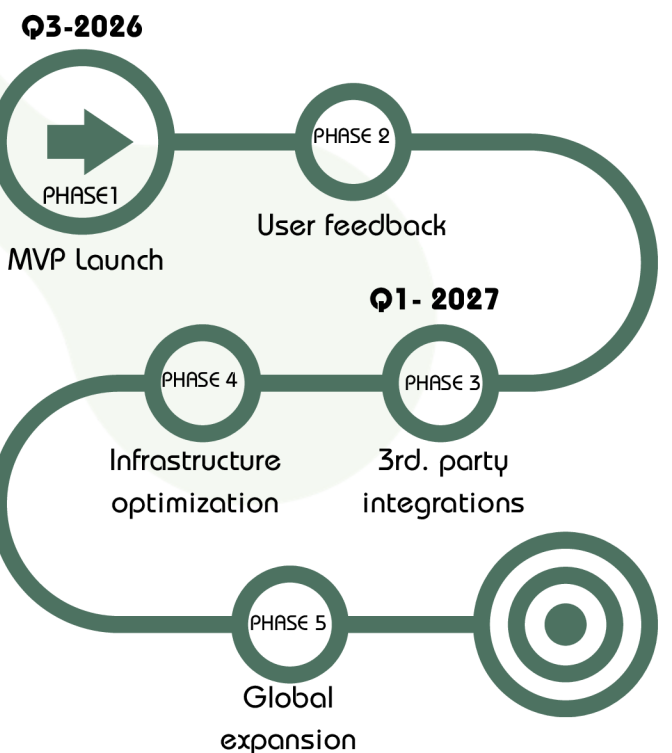

Florencia, PhD
CTO

Facundo, PhD
CSO

ROAD MAP

Location: Buenos Aires, Argentina (HQ).

Technology Verticals: Plant biotechnology, advanced chemical characterization, functional transcriptomics, artificial intelligence, data science, and biosynthetic production.

At Moka, we accelerate the discovery, validation, and standardized production of natural bioactives

10x faster and **30x cheaper.**
